LACQUER

Our lacquered furniture are made of mdf- or chip board. This means that the surface will never be 100% even.

WOOD

Our wooden furniture is made of veneered mdf- or chip board. The surfaces are treated with either furniture oil or lacquer. Wood is a living material and is shifting in colour and structure. It is influenced in different degree by light, moisture and temperature. Colour differences and twigs does not count as a defect. It is the liveness in the wood that for centuries has fascinated us humans to make beautiful and functional products of this material.

LACK

På lackerad möbler använder vi oss av mdf- eller spånskivor som grundmaterial. Detta innebär att underlaget aldrig blir 100% slätt. Vilket i sin tur medför att den slutliga lackerade ytan kan innehålla vissa ojämnheter.

TRÄ

Våra trämöbler är gjorda av fanerade mdf- eller spånskivor. Ytorna är behandlade antingen med olja eller lack. Trä är ett levande material som skiftar i färg och struktur. Det påverkas i olika grad av ljus, fuktighet och temperatur. Färgskiftningar och kvistar är helt naturliga och anses inte var fel. Tvärtom så är det just "livet" i träet som i århundraden fascinerat oss människor till att använda detta material för att tillverka vackra och funktionella produkter.
